Work Experience

Software Engineer, September 2018 – Present

Grateful Ventures – Phoenix, AZ

- Build out internal company tools using React, AWS, GraphQL, and Material UI.
- Provide client bloggers with ad placement support and bug fixes using JavaScript.
- Deploy changes to production on a nearly daily basis while working in a CI/CD environment.
- Provide technical mentorship to novice software developers.

Full Stack JavaScript Developer, April 2018 – June 2018

Styr Labs, Inc. – Scottsdale, AZ

- Developed a web-based admin portal using JavaScript, React, Redux, and Sass.
- Interacted with company clients to understand tech requirements, desires, and bugs within products.
- Enforced scrum-inspired protocol and team developed rules for committing, testing, and deploying code to production.
- Created and groomed the team's storyboard as needed.

Self-Employed Web Developer, January 2017 – Present

Phoenix, AZ

- Strong interest in UI web development utilizing React.
- Experience with small group collaboration (< 5 people) and solo development.
- Capable of building out the backend from the ground up.
- Builds various apps and other projects during spare time.

Education

Full Stack Development Certificate Program, July 2017 – Jan. 2018

University of Arizona – Gilbert, AZ

Bachelor of Integrative Studies, Magna Cum Laude, Aug. 2011 – May 2014

Ferris State University – Big Rapids, MI
